If you want to search these writings for a particular topic, like Emmet Fox's *Sermon on the Mount* or the Oxford Group, and you use Windows 10 as the operating system for your computer,

1. download the MS Word .DOC texts of all these books into a single file folder on your computer.
2. Then call up that file folder, and use the small search window at the top right to search for files where the text contains the word Fox or Oxford (or what have you).
3. Open each of the texts that pop up, in turn, and search that MS Word .DOC manuscript for the word (Fox or Oxford or whatever is appropriate).

Do not be misled by the book titles: there is detailed material on Emmet Fox for example in both the book on *A.A. Meetings in Akron and Cleveland* and in the book on *Father Ed Dowling*. Check *all* of the books individually if necessary in order to find all the references.
